Inside this package:

- HOBO U12 Temp/RH/Light/External Data Logger

- Mounting kit with magnet, hook and loop tape, tie-wrap mount, tie wrap, and two screws.

Thank you for purchasing a HOBO data logger. With proper care, it will give you years of accurate and reliable measurements.

The HOBO U12 Temperature/Relative Humidity/Light/External Data Logger is a four-channel logger with 12-bit resolution and can record up to 43,000 measurements or events. The external channel accepts a variety of sensors, including temperature, and split-core AC current sensors as well as 4-20 mA and voltage input cables (sold separately). The logger uses a direct USB interface for launching and data readout by a computer.

### Specifications

| Measurement range | Temperature: -20°C to 70°C (-4°F to 158°F) at 0% RH
| Light intensity: 1 to 5000 footcandles (lumens/ft²) typical; maximum value varies from 1500 to 4500 footcandles (lumens/ft²)
| External input channel (see sensor manual): 0 to 2.5 DC Volts |
| Accuracy | Temperature: ±0.3°C from 0°C to 50°C (±0.5°F from 32°F to 122°F), see Plot A
| RH: ±2.5% from 10% to 90%, see Plot B; conditions above 80% RH and 60°C (140°F) may cause additional error
| Light intensity: Designed for indoor measurement of relative light levels, see Plot D for light wavelength response
| Resolution | Temperature: 0.03°C at 25°C (0.05°F at 77°F), see Plot A
| RH: 0.03% RH |
| Drift | Temperature: 0.1°C/Year (0.2°F/Year)
| RH: <1% per year typical, RH hysteresis 1% |
| Response time in airflow of 1 m/s (2.2 mph) | Temperature: 6 minutes, typical to 90% RH; 1 minute, typical to 90% |
| Time accuracy | ≤1 minute per month at 25°C (77°F), see Plot C
| Operating temperature | Logging: -20°C to 70°C (-4°F to 158°F)
| Launch/Readout: 0°C to 50°C (32°F to 122°F), per USB specification |
| Battery life | 1 year typical use |
| Memory | 64k bytes (43,000 12-bit measurements)
| Weight | 46 g (1.6 oz)
| Dimensions | 58 x 74 x 22 mm (2.3 x 2.9 x 0.9 inches)
| CE Mark | The CE Marking identifies this product as complying with all relevant directives in the European Union (EU). |

### Connecting the logger

The U-Family logger requires an Onset-supplied USB interface cable to connect to the computer. If possible, avoid connecting at temperatures below 0°C (32°F) or above 50°C (122°F).

1. Plug the large end of the USB interface cable into a USB port on the computer.

2. Plug the small end of the USB interface cable into the bottom of the logger as shown in the following diagram.

If the logger has never been connected to the computer before, it may take a few seconds for the new hardware to be detected. Use the logger software to launch and read out the logger.

**Important:** If you configure the logger to start with a button start, be sure to press and hold down the button on the front of the logger for at least three seconds when you want to begin logging.

If using an external sensor, be sure to plug it into the side of the logger before logging begins. Also select the correct sensor and activate the external channel in the logger software when configuring the launch.

**Important:** If you select an external channel, but do not plug the light sensor in, false data will be recorded for that channel.

You can read out the logger while it continues to log, stop it manually with the software, or let it record data until the memory is full.

Refer to the software user’s guide for complete details on launching, reading out, and viewing data from the logger.

### Sample and event logging

The logger can record two types of data: samples and events. Samples are the sensor measurements recorded at each logging interval (for example, the temperature every minute). Events are independent occurrences triggered by a logger activity. Examples of events recorded asynchronously during deployment include when the logger is connected to the host, when the battery is low, the end of a data file once the logger is stopped, and button pushes.

Press the button on the front of the logger for one second to record an event. Both a button up and down event will be recorded. This is useful if you want to mark the datafile at a particular point. For example, if the logger is located in an incubator, you might press the button each time the door is opened.

The logger stores 64K of data, and can record up to 43,000 samples and events combined.

### Using external sensors

The external input channel has a switched 2.5 V output. This signal can be used to power a sensor directly or it can also be used to trigger an external circuit. An external sensor should draw no more than 4 mA total when powered. The switched 2.5 V output turns on about 15 ms before the logger is launched with Button Start or press for 1 second to record an event while logging.

The logger stores 64K of data, and can record up to 43,000 samples and events combined.

Service and Support

HOBO products are easy to use and reliable. In the unlikely event that you have a problem with this instrument, contact the company where you bought the logger: Onset or an Onset authorized dealer. You can evaluate and often solve the problem if you write down the events that led to the problem (are you doing anything differently?) and if you visit the Technical Section of the website www.onsetcomp.com/support.html. When contacting Onset, ask for technical support and be prepared to provide the product number and serial number for the logger and software version in question. Also completely describe the problem or question. The more information you provide, the faster and more accurately we will be able to respond.

Onset Computer Corporation
470 MacArthur Blvd., Bourne, MA 02532
E-mail: loggerhelp@onsetcomp.com
Fax: 508-759-9100

Returning Products to Onset
Direct all warranty claims and repair requests to place of purchase. Before returning a failed instrument, you must provide proof that you purchased the Onset product(s) directly from Onset (purchase order number and serial number). Onset will issue an RMA number that is valid for 30 days. You must ship the product(s), properly packaged to protect against further damage, to Onset (at your expense) with the RMA number marked clearly on the outside of the package. Onset is not responsible for any package that is returned without a valid RMA number or for the loss of the package by any shipping company. Products must be clean and free of any contaminants before they are sent back to Onset or they may be returned to you.

Repair Policy
Products that are returned after the warranty period or that are damaged by the customer as specified in the warranty provisions can be returned to Onset with a valid RMA number for evaluation.

Optional Services
Please contact Onset for more information and prices on:

• ASAP Repair. Onset will expedite the repair of a returned product.

• Data-back™ Service. HOBO data loggers store data in nonvolatile EEPROM memory. Onset will, if possible, recover your data from a disk.

• Tune Up Service. Onset will examine and test any HOBO data logger.

Warranty

Onset Computer Corporation (“Onset”) warrants to the original end-user Purchaser for a period of one year from the date of original purchase that the HOBO product(s) purchased will be free from defects in material and workmanship. During the warranty period Onset will, at its option, either repair or replace products that prove to be defective in material or workmanship.

The following table explains when the logger blinks during logger operation.

<table>
<thead>
<tr>
<th>When:</th>
<th>The logger:</th>
</tr>
</thead>
<tbody>
<tr>
<td>The logger is logging</td>
<td>Blinks once every one to four seconds (the shorter the logging interval, the faster the light blinks), blinks when logging a sample</td>
</tr>
<tr>
<td>The logger is awaiting a start because it was launched in Start At Interval, Delayed Start, or Button Start mode</td>
<td>Blinks once every eight seconds until launch begins</td>
</tr>
<tr>
<td>The button on the logger is being pushed for a Button Start launch</td>
<td>Blinks once every second while pressing the button and the light flashes rapidly once you release the button. The light then reverts to a blinking pattern based on the logging interval</td>
</tr>
</tbody>
</table>

Using the RH sensor

In order to take humidity measurements, the temperature sensor must be used in conjunction with the RH sensor. Conditions outside the recommended range may offset the RH signal. Vapors may also affect the RH sensor. The diffusion of chemicals into the sensor may cause a shift in both offset and sensitivity. High levels of pollutants may cause permanent damage to the sensor.

Upon returning to normal conditions, the RH sensor will slowly return towards calibration state by itself. However, prolonged exposure to extreme conditions may accelerate aging and eventually lead to a permanent shift. To recondition the sensor, do the following:

1. Remove the battery
2. Warm 24 hours 80–90°C (176–194°F) at < 5% RH
3. Re-hydrate 48 hours 20–30°C (70–90°F) at 75–95% RH

Protecting the logger

The logger can be permanently damaged by corrosion if it gets wet. Protect it from condensation. If it gets wet, remove the battery immediately and dry the circuit board with a hair dryer before reinstalling the battery. Do not let the board get too hot. You should be able to comfortably hold the board in your hand while drying.

Battery

The logger requires one 3-Volt CR-2032 lithium battery. Expected battery life varies based on the temperature and the frequency at which the logger is recording data (the logging interval). A new battery will typically last one year with logging intervals greater than one minute. Deployments in extreme heat or logging intervals faster than one minute may significantly reduce battery life.

To replace the battery:
1. Disconnect the logger from the computer.
2. Unscrew the logger case.
3. Lift the circuit board and carefully push the battery out with a small blunt instrument, or pull it out with your fingernail.
4. Insert a new battery, positive side facing up.
5. Carefully realign the logger case and re-fasten the screws.

This warranty is void if the product has been damaged by the Purchaser as a result of improper maintenance, misuse, misapplication, or negligence of Purchaser, or if there has been an unauthorized alteration, attachment or modification.

THERE ARE NO WARRANTIES BEYOND THE EXPRESSED WARRANTY AS PROVIDED IN THIS DOCUMENT AND NO EVENT SHALL ONSET BE LIABLE FOR LOSS OF PROFITS OR INDIRECT, CONSEQUENTIAL, CONSEQUENTIAL, INCIDENTAL, SPECIAL OR OTHER SIMILAR DAMAGES ARISING OUT OF ANY BREACH OF THIS CONTRACT OR OBLIGATIONS UNDER THIS CONTRACT, INCLUDING BREACH OF WARRANTY, NEGLIGENCE, STRICT LIABILITY, OR ANY OTHER LEGAL THEORY.

LIMITATION OF LIABILITY. The Purchaser’s sole remedy and the limit of Onset’s liability for any loss whatsoever shall not exceed the Purchaser’s price of the product(s). The determination of suitability of products to the specific needs of the Purchaser is solely the Purchaser’s responsibility. THERE ARE NO WARRANTIES BEYOND THE EXPRESSED WARRANTY IN THIS DOCUMENT. EXCEPT AS SPECIFICALLY PROVIDED IN THIS DOCUMENT, THERE ARE NO OTHER WARRANTIES EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OF MERCHANTABILITY, SATISFACTORY QUALITY, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. NO INFORMATION OR ADVICE GIVEN BY ONSET, ITS AGENTS OR EMPLOYEES SHALL CREATE A WARRANTY OR IN ANY WAY INCREASE THE SCOPE OF THE EXPRESSED WARRANTY OFFERED WITH THE SALE OF THIS PRODUCT.

INDEMNIFICATION. Products supplied by Onset are not designed, intended, or authorized for use as components intended for surgical implant or ingestion into the body or other applications involving life-support, or for any application in which the failure of the Onset-sold product could create or contribute to a situation where personal injury or death may occur. Products supplied by Onset are not designed, intended, or authorized for use in or with any nuclear installation or activity. Products supplied by Onset are not designed, intended, or authorized for any other mission-critical application or service, such as any military or space application or activity. Onset will indemnify Buyer and hold Onset harmless from any liability or damage whatsoever arising out of the use of the product and/or equipment in such manner.

LEGAL REMEDIES. This warranty gives you specific legal rights. You may have other rights which vary by jurisdiction. The remedies provided herein are in lieu of all other remedies, express or implied.
